

Sahil Dua

Technical Product Manager, AI Platforms

hello@duasahil.com · duasahil.com · linkedin.com/in/sahildua78 · github.com/dsahil78

I build AI that enterprises trust in production. Product experience across document AI, enterprise SaaS, and marketplaces, including founding an inventory platform that exited through a technology/IP sale.

EXPERIENCE

ProductSquads · Lead Product Manager | Feb 2025 to Sep 2025

PE-backed enterprise document AI. Delivered with 2 engineering pods and a 50-person human review team. Processed 100K+ documents/month at 95%+ accuracy: field-level exact match, before human review. Turnaround improved 70% at under 1 cent per page.

Replaced 6+ planned per-format parsers with schema-driven retrieval. Built an evaluation framework spanning per-tenant golden sets, LLM-as-judge, human review, and online monitoring. Release decisions were made against golden sets.

Closphere · Founder & Product Lead | Dec 2023 to Jan 2025

Led a 12-person team and discovery with 50+ customers. Reached 63 paying customers, 1K+ users, and 112 locations before a technology/IP sale.

Inventory record accuracy improved from 75% to 95%; stockouts fell 32%; reconciliation effort fell 70%+. Onboarding moved from 6+ weeks to under 7 days. Referrals drove approximately 30% of new business.

Supreme Components · Product Manager | Aug 2023 to Dec 2023

Product work across a quoting workflow handling 8K RFQs/month. In-stock quotes moved from 18 hours to under 1 hour; out-of-stock turnaround moved from 15 days to under 3 days. Separately, shipment tracking and forecasting reduced logistics costs by 22%.

Filo · Product Manager (Founding US PM) | Aug 2022 to Aug 2023

The US marketplace went on to reach 120K users and \$1.5M ARR in six months. 98% of US requests matched in under 45 seconds against a 60-second target. Conducted 100+ user interviews; activation increased 35% and conversion reached 3%+.

SELECTED EXPERIMENTS

Kindred · Class project. Dempsey Startup Competition investment round, top 39 of approximately 200; Best Marketplace Idea, sponsored by eBay.

TalentSphere. Most Innovative and Viable Product, UW MSIM Hackathon. Rotten Tom-AI-toes. Evaluation workflows across 6 trust dimensions and 17 foundation models.

EDUCATION

University of Washington. MS Information Management, Product & AI | Sep 2025 to Aug 2026

Amity University. BTech Computer Science and Engineering | 2016 to 2020

TECHNOLOGY & CERTIFICATIONS
