

SAHIL DUA

Technical Product Manager | AI-Native Platforms & Enterprise Systems

Seattle, WA | (206) 799-0280 | sahildua033@gmail.com | [linkedin.com/in/sahildua78](https://www.linkedin.com/in/sahildua78) | duasahil.com | github.com/dsahil78

Technical Product Manager with 5+ years building and scaling AI, data, and platform products from 0 to 1 to scale. Built retrieval, evaluation, routing, and HITL systems processing 100K+ docs/month at 95%+ accuracy, and a pricing and quoting workflow processing 8K+ RFQs/month. Founded an inventory intelligence SaaS that grew to 63 paying customers before a technology sale.

EXPERIENCE

Lead Product Manager | ProductSquads Technolabs Feb 2025 - Sep 2025

- Led product for an enterprise platform turning unstructured, multi-format documents into structured data, processing **100K+ documents a month at 95%+ accuracy** and cutting turnaround 70%, across 2 engineering pods and a 50-person review team.
- Built an LLM evaluation framework used to gate releases: tenant-level golden datasets, LLM-as-judge scoring, HITL annotation pipeline, and online production monitoring, measuring field-level accuracy, hallucination rate, and confidence calibration.
- Owned roadmap and prioritization across workflows, introducing confidence thresholds and complexity-based model routing to automate routine cases while escalating complex ones, balancing accuracy, latency, cost, and automation.
- Analyzed long-tail extraction failures and replaced six planned format-specific parsers with a schema-driven retrieval architecture, turning new-variant onboarding into a config change and reviewer corrections into system-level quality loops.

Founder and Product Lead | Closphere Dec 2023 - Jan 2025

- Founded an inventory intelligence SaaS to give manufacturers a single source of truth for inventory across disconnected IT systems, growing it to 1K+ users across 63 paying companies with a 12-person team, before exiting through a technology sale.
- Led **50+ customer discovery interviews** and identified fragmented ERP and inventory systems as the primary barrier to operational visibility, repositioning the product from ERP replacement to an ERP-agnostic intelligence layer.
- Designed a canonical inventory model and reconciliation layer across Tally, Zoho, Vyapar, and customer systems, improving **inventory record accuracy from 75% to 95%+.**
- Launched replenishment optimization that reduced **stockouts by 32%** and cut onboarding from **6+ weeks to under 7 days**; referrals drove roughly 30% of new business, with **90%+ retention.**

Product Manager | Supreme Components International Aug 2023 - Dec 2023

- Built the company's first AI-powered sales and pricing workflow, an internal tool combining intent classification, extraction, and quote routing across **8K+ RFQs/month**, cutting in-stock quote turnaround from **18 hours to under 1 hour.**
- Defined confidence tiers, price floors, escalation paths, and human overrides that enabled commercial adoption of the workflow, reducing out-of-stock RFQ turnaround from **15 days to under 3 days.**

Product Manager | Filo Edtech Aug 2022 - Aug 2023

- Launched and scaled the US tutoring marketplace from zero to **120K users and \$1.5M ARR** in six months, on a global platform serving 3.3M+ users and 250K DAU.
- Rejected a lift-and-shift of India's matching logic and designed US-specific matching around tutor liquidity, subject, pricing dynamics, geography, and session intent, fulfilling **98% of requests in under 45 seconds** against a 60-second target.
- Identified activation drop-offs through 100+ user interviews, funnel analysis, and cohort data, then partnered with design and engineering to ship onboarding and session-continuity improvements that increased **activation by 35%.**

Product Analyst | KPMG Sep 2021 - Aug 2022

- Led product discovery and analytics initiatives for 15+ Fortune 500 and late-stage clients, translating workflow bottlenecks and user needs into product requirements, roadmap priorities, and launch decisions.

Assistant System Engineer | Tata Consultancy Services Feb 2021 - Sep 2021

- Built batch and streaming data pipelines for enterprise systems, with scheduling, backfills, retries, and idempotent processing.

SELECT PROJECT

Kindred - AI-powered Patient-Therapist Matching Platform

Drove the product from discovery to a prototype, defining positioning, matching, and scheduling logic; reached the investment round at the UW Dempsey Startup Competition (top 39 of ~200 teams) and won Best Marketplace Idea, sponsored by eBay.

EDUCATION

University of Washington, Seattle, WA Sep 2025 - Aug 2026

Master of Science in Information Management, Product and Artificial Intelligence Specialization GPA: 3.76/4.0

Amity University, Noida, India Jul 2016 - Jun 2020

Bachelor of Technology, Computer Science and Engineering CGPA: 8.48/10.0

CORE SKILLS

Product:	Product Strategy, Roadmap & Prioritization, Product Discovery, Go-to-Market, 0-to-1 Launches, Experimentation & A/B Testing, Pricing, Human-in-the-Loop Design, Requirement Definition
AI Systems:	LLM Evaluation, RAG, Agentic Workflows, MCP, Context Engineering, Guardrails, LangChain/LangGraph
Technical:	AWS/Azure, SQL, Python, API Design, System Design, Data Pipelines, Prototyping, Amplitude/Mixpanel
Certifications:	Microsoft AI & ML Engineering Professional, Microsoft Azure Solutions Architect Expert (AZ-305)
